Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-16 are, drawn to a method for harvesting portions of an animal carcass, classified in class 452, subclass 149.
- II. Claims 17-28 are, drawn to an apparatus for harvesting portions of an animal carcass, classified in class 452, subclass 155.
- III. Claims 29-40 are, drawn to a method of harvesting chicken paws of edible quality, classified in class 452, subclass 149.
- IV. Claims 41-50 are, drawn to an apparatus for harvesting chicken paws, classified in class 452, subclass 155.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III and IV are related as process and apparatus for its practice.

The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, invention I has separate utility over invention II, and invention III has separate utility over invention IV, in that the method for harvesting portions of an animal carcass of invention I , and similarly, invention III can be practiced by hand using ordinary and common tools.

IF THE APPLICANTS ELECT INVENTION I AND III OR IF THE APPLICANTS ELECT INVENTION II AND IV, THEN THE FOLLOWING ELECTION REQUIREMENT APPLIES.

This application contains claims directed to the following patentably distinct species of the claimed invention: Invention I as claimed in claims 1-16 and Invention III as claimed in claims 29-40, or Invention II as claimed in claims 17-28 and Invention IV as claimed in claims 41-50.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there are no claims generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over

the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Robert Gerstein on August 22, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
